

Exhibit 6-5: Perceived Weaknesses of the Guideline
(Percent of Respondents)¹
(n = 616)

¹Multiple Response question, thus proportions may exceed 100%. Only answers mentioned by at least 5% of all respondents are shown individually in the figure. To compute the number of respondents who mentioned each weakness, multiply the percentage by 616. Thus, 19% x 616 = 117 respondents said a weakness of the guideline is that it yields support amounts that are too high.

²Other: too complex, ignore direct expenses on the child, not fair, do not require verification of how child support is spent, hard to explain.
